

Conditional dependency-rent bound

Gross supply 12; need 6; one-time exit cost 12. No Unflatten effect is assumed.

Alternative supply after exit		4	6	8	10	12
Reserve	0	6 *	6 *	6 *	6 *	6 *
	6	6 *	6 *	6 *	6 *	6 *
	12	6 *	6	4	2	0
	24	6 *	6	4	2	0

* Exit not feasible under the stated resource conditions.

Zero means no positive dependency rent in this local model, not absence of all power.
